

# ANTON GABRIEL CLORES

Web Content Specialist | QA Engineer

+639058812346 • antonclores@gmail.com • linkedin.com/in/anton-clores/ • Sta. Ana, Manila

## PROFESSIONAL SUMMARY

---

Results-driven Web Content Specialist and QA Engineer with over 5 years of experience delivering high-quality digital content and ensuring software reliability across enterprise environments. Proven expertise in Adobe Experience Manager (AEM), WordPress, and end-to-end quality assurance — spanning functional, regression, performance, and system integration testing. Skilled at bridging technical QA discipline with strategic web content production to publish accurate, accessible, and search-optimized digital experiences. Experienced collaborating with international stakeholders across Europe and the United States.

## CORE COMPETENCIES

---

- |                                           |                                                  |
|-------------------------------------------|--------------------------------------------------|
| • Manual & Automated Testing              | • Content Management Systems (AEM, WordPress)    |
| • Functional, Regression & Performance QA | • SEO Strategy & Web Marketing                   |
| • Test Plan Design & Execution            | • Web Design & Front-End Development             |
| • System Integration Testing (SIT)        | • Visual Graphic Design (NC III)                 |
| • Defect Tracking & Reporting             | • Cross-Functional & International Collaboration |

## WORK EXPERIENCE

---

### QA and Web Content Specialist | Trend Micro

Nov 2024 – Present

- Manage and publish content across multiple global web properties using Adobe Experience Manager (AEM) and WordPress CMS platforms, ensuring brand consistency and accuracy.
- Develop and execute web marketing strategies that drive organic traffic growth and improve audience engagement metrics.
- Conduct pre-launch QA reviews of web pages and deliverables, verifying adherence to style guides and UX standards before client or public release.
- Collaborate with cross-functional stakeholders across the Philippines, Europe, and the US to align content with regional campaign objectives.
- Perform SEO tasks including metadata optimization, internal linking, and content audits to improve search engine discoverability.

### QA and Web Production Specialist | Trend Micro / Viventis

Jan 2021 – Nov 2024

- Designed and produced high-fidelity web pages in Adobe Experience Manager (AEM) using established style guides and pre-built asset libraries.
- Executed end-to-end QA reviews of websites and digital deliverables prior to launch, identifying and resolving issues that reduced post-release defects.
- Deployed Deeptrawl for automated accessibility and quality scans across web properties, maintaining compliance with internal and external content standards.
- Implemented SEO best practices — including internal linking, metadata curation, and content structuring — to improve site crawlability and page rankings.

- Coordinated production workflows with international colleagues across Europe and the US, adapting to diverse editorial schedules and time zones.

#### **Quality Assurance Engineer | Bancnet / Primover Consultancy**

Aug 2020 – Jan 2021

- Designed, developed, and tested IT systems for banking operations, ensuring solutions met organizational standards and regulatory requirements.
- Established and enforced SDLC quality policies and procedures to maximize software efficiency and minimize defect escape rates across all development phases.
- Monitored and validated banking transactions using PuTTY, facilitating client-facing System Integration Testing (SIT) sessions and tracking resolution progress.
- Executed comprehensive test plans covering functional, regression, and performance scenarios, coordinating issue reporting and remediation with development teams.
- Performed database validation using Microsoft SQL Server to confirm accuracy of test results and data integrity.

#### **Software Quality Assurance Engineer | Accenture / AAISI**

Aug 2019 – Aug 2020

- Designed and executed structured test plans for enterprise applications, covering functional, regression, performance, and system integration test scenarios.
- Verified cross-platform compatibility between PC and mobile environments, ensuring coordinated system behavior across device types.
- Managed test case definition, execution, and results tracking using Microsoft Test Manager, including manual and exploratory testing methodologies.
- Validated data accuracy and test outcomes against expected results using Microsoft SQL Server database queries.
- Completed Accenture-delivered training programs in Selenium automation, ALM, SDLC frameworks, and UFT scripting.

### **EDUCATION**

---

**Bachelor of Science in Information Technology | STI College Pasay Edsa**

2015 – 2019

### **CERTIFICATIONS & TRAINING**

---
